## PRICE LIST

FRANCIS B. GRIFFIN

C. E. JENNINGS & CO.  
MANUFACTURERS OF

### High Grade Mechanics' Tools

C. E. Jennings' Arrow  Head Tools are made by skilled mechanics, under our PERSONAL Supervision. Our aim is to excel in quality and workmanship. We spare no pains to make our tools THE BEST. They are carefully tempered and rigidly inspected. Mechanics can make no mistake in selecting C. E. Jennings' Arrow  Head Tools, nor can the dealer in handling them.

### Caution to the Trade

The name "Jennings" stamped on a tool is apt in some cases to be misleading, as tools are sometimes stamped "Jennings," and "Jennings' Pattern." In order to protect the trade against imitations, we have adopted C. E. Jennings' ARROW  HEAD, Registered Trade Mark. In ordering our tools look for the initials, C. E., before the word "Jennings," and our Arrow  Head Trade Mark. All tools bearing C. E. Jennings' Arrow  Head Trade Mark, are fully warranted against breakage, by fair usage, and any defective tools will be replaced, no charge. Always order C. E. Jennings' Arrow  Head Tools by name and number, and accept no substitute.

#### GENERAL OFFICE

71 & 73 MURRAY STREET

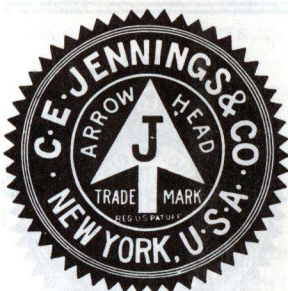

NEW YORK, U. S. A.

#### FACTORIES

## Machine Expansive Bits

**This Bit Takes the Place of 35 Augers Costing \$25.00**

Adjusted by simply turning the adjusting screw: Can be adjusted to a hair and will stay where put, making each and every hole, both on top and bottom, exact to size.

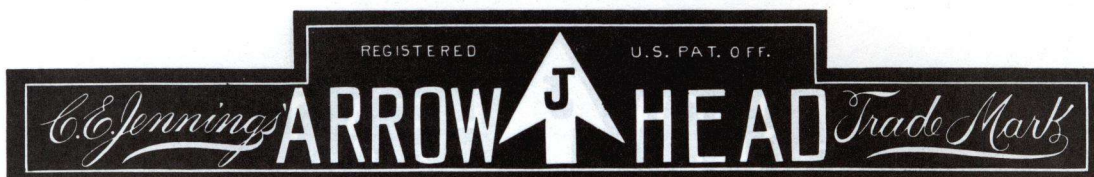

These Arrow  Head Machine Expansive Bits are fitted with machine shanks 2 inches long x 1-2 inch diameter and are furnished with diamond point or screw-point as ordered: When ordering, be sure and specify which is wanted. The entire stem is hardened and the cap which holds the cutter in place is also hardened, making the entire bit very strong and tough. Like all other Arrow Head Tools they are fully warranted.

All dealers are authorized to take back and exchange any that prove defective by fair usage.

No. 13 Bit with two Cutters, cutting from 7-8 to 3 inches.....List price per dozen, \$39.00  
 No. 14 Bit with three Cutters, cutting from 7-8 to 4 inches.....List price per dozen, 51.00

Price on Extra Parts same as on Extra for Regular C. E. Jennings' Arrow Head, Steers' Patent, Expansive Bits.

Packed in individual canvas pockets and six in a carton.

## Single Twist Auger Bits in Sets

Packed in our No. 700 Flexible Canvas Bit Roll

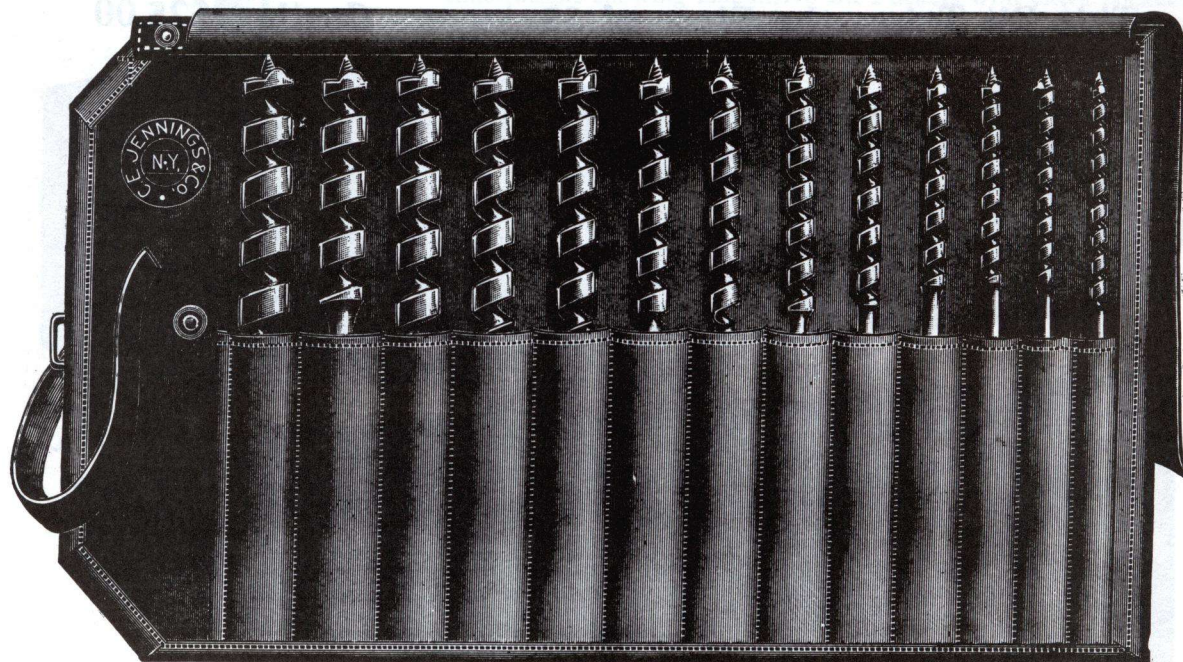

Illustration of Bit Set No. 701 $\frac{1}{2}$ -13

This canvas bit roll was designed by us, especially for mechanics, who carry their tools about with them. It is made of canvas, lined with Canton Flannel. There is a separate pocket for each Bit. The points and cutting edges are protected by a flap. When folded the Roll complete measures only 11 x 3 inches.

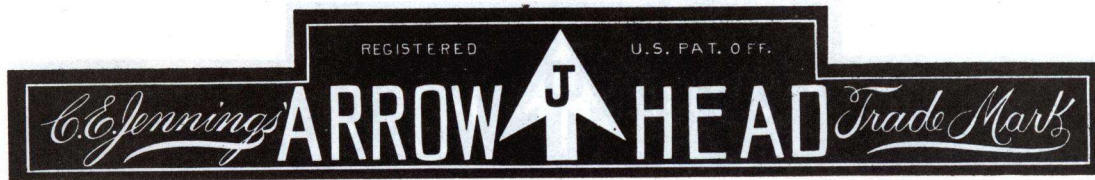

No. 701 $\frac{1}{2}$ -13 Set, comprising 13 C. E. Jennings' No. 1 $\frac{1}{2}$  Auger Bits, 32 $\frac{1}{2}$  quarters, 1 each 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15 and 16-16ths.....per set, \$9.00

No. 701 $\frac{1}{2}$ C-13 Set, comprising 13 C. E. Jennings' No. 1 $\frac{1}{2}$ C Auger Bits, 32 $\frac{1}{2}$  quarters, with black anti-rust oil finish in twist and polished edges, 1 each 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15 and 16-16ths..... " 7.00

Packed 1 set in a box. Full cases contain 25 sets

### Approximate Weights

| Single Sets          | Cases of 25 Sets | Gross    | Net      | Measurement |
|----------------------|------------------|----------|----------|-------------|

## Single Twist Auger Bits

No. 1 1-2

Bright Finish. Beautifully Polished and of Superb Workmanship

### Single Thread Screw Point

We consider our No. 1½ the Best Auger Bit made in the world. The twist is patterned after that of our L'Hommedieu Ship Auger. This bit has one spur and one lip, which reduces the friction to a minimum. It has a single thread screw point and the speed has been carefully studied so as to obtain the very best results possible, in all kinds of wood.

It will bore equally well in hard or soft wood.

The pitch of the lip matches up with the threads of the screw points, so that the bit will lead easily into the wood.

It will also bore with the grain or against the grain. Every bit is tested in hard wood before leaving the factory.

We recommend our No. 1½ Bits to the mechanic who can afford only one set of Bits. These bits are accurately sized, and carefully tempered.

For sets of these Bits in canvas rolls and in special wood boxes, see pages 8, 11 and 13.

Sets are packed one set in a paper box. Separate sizes in boxes of one-half dozen.

## Single Twist Auger Bits

No. 1 1/2 C

Anti-Rust Black Oil Finish in the Twist. Polished Shanks and Edges.  
Single Thread Screw Point.

Our No. 1 1/2 C Auger Bits are similar to our No. 1 1/2, but with black anti-rust oil finish in the twist.

They will bore in hard or soft wood. The single thread screw point will not clog.

Sets are packed 1 set in a paper box.

Separate sizes 1/2 dozen in a paper box.

For sets of these bits in special boxes and rolls see pages 8, 11 and 13.

## Extension Lip Auger Bits No. 10

Bright Finish. Extra Fine Polish

Double Thread Screw Point

Our No. 10 is an extension Lip Pattern, Double Twist, Auger Bit, with two spurs, two extension lips, and fine double thread screw.

This bit is designed for pattern makers, and for use in soft wood. It will bore a smooth straight hole, and is *accurately sized*, and carefully tempered same as are all our tools.

Sets are packed one set in a paper box. Separate sizes are packed 3/16 to 9/16 inclusive in paper boxes of one dozen. Larger sizes in paper boxes of one-half dozen.

For sets of these Bits in canvas rolls or in special wood box, see pages 9, 12 and 13.

## Solid Center Auger Bits

No. 2 1/2

Bright Finish.

With Extension Lips and Single Thread Screw Point.

Our No. 2 1/2 is a solid center auger bit with two extension lips, two spurs and single thread screw point. The main feature of this bit is the *solid center*. This bit has a narrow single twist very open, except at the head. Here it has a double twist, same as our No. 10 bit.

It is especially adapted for *electricians* and *linemen*. It will bore a smooth clean hole, and may be used for either hard or soft wood.

Car bits with 12 inch twist of this pattern make the best linemen's bit for deep holes.

The twist of this bit is patterned after the famous Archimedian Screw, which that ancient inventor got up for drawing water from a lower to a higher level. This bit is accurately sized and carefully tempered.

For sets of these bits packed in canvas rolls or special wood boxes, see pages 10, 15 and 16.

## Improved Lip and Spur-Auger Bits

### No. 30

Bright Finish. Single Thread Screw Point.

Our No. 30 is an Auger Bit with double twist, single thread screw point, extension lips, and double spurs. This bit is designed for long wear. After wearing the spurs half away, and after wearing the lips back to the base of the spurs, one still has a bit that is equal to a standard pattern bit. Even after the spurs have been completely worn away, this bit may be used for rough work. It may be used either in hard or soft wood, and bores a smooth hole. In hard wood, it does not bore so easily as our other patterns, on account of the resistance caused by its long wearing qualities, *i. e.*, the heavy double spurs and extension lips.

#### Price List of Individual Sizes

## Solid Center Car Bits

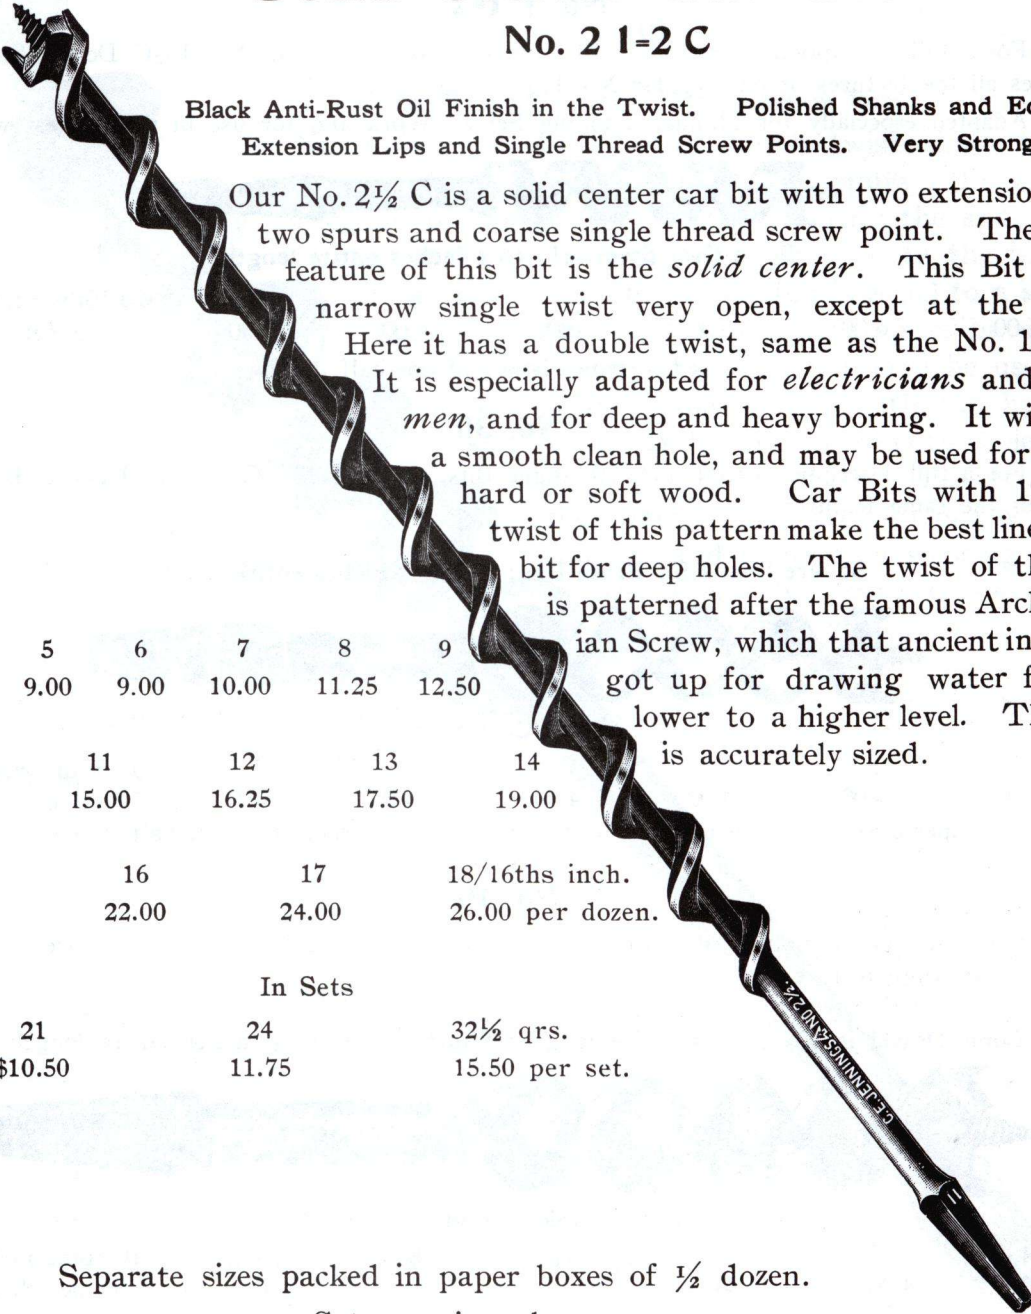

### No. 2 1-2 C

Black Anti-Rust Oil Finish in the Twist. Polished Shanks and Edges.

Extension Lips and Single Thread Screw Points. Very Strong.

Our No. 2 1-2 C is a solid center car bit with two extension lips, two spurs and coarse single thread screw point. The main feature of this bit is the *solid center*. This Bit has a narrow single twist very open, except at the head. Here it has a double twist, same as the No. 10 Bit.

It is especially adapted for *electricians* and *linemen*, and for deep and heavy boring. It will bore a smooth clean hole, and may be used for either hard or soft wood. Car Bits with 12 inch twist of this pattern make the best linemen's bit for deep holes. The twist of this bit is patterned after the famous Archimedian Screw, which that ancient inventor got up for drawing water from a lower to a higher level. This bit is accurately sized.

Sizes above 2 inch made to order only.

Packed in boxes of one-half dozen

## "L'Hommedieu" Ship Augers

L'Hommedieu Ship Augers and Bits have been on the market since 1818 and are made only at the L'Hommedieu and Tracy Tool Works. We are the successors of the *original* ship auger makers in America. Our ship augers are made by skilled mechanics, are accurately sized, and uniformly tempered. They have stood the test of nearly a century. Insist on having the genuine C. E. JENNINGS' L'HOMMEDIEU SHIP AUGERS, branded with our registered ARROW  HEAD trade mark, and our full name on the shank. Thus: "L'Hommedieu—E. H. Tracy—C. E. Jennings  They are especially adapted for Bridge, Dock, Ship and Car Building, and for boring hard wood.

Illustration of L'Hommedieu Ship Auger, with Screws No. 13

Illustration of L'Hommedieu Ship Auger, without Screws No. 12

Note—In ordering always state whether ship augers, with or without screws. Sizes above 1 6/8 made to order only.

L'Hommedieu Ship Augers, without screws, will bore a very straight hole. The speed of this auger is regulated entirely by the pitch of the lip. The head instead of being round is elliptical in shape. The back of the head bears upon the side of the hole when boring. The friction thus caused helps to draw the auger in. In using a no screw auger, a hole or dent must be made in order to start the auger. Making such a hole is called "spotting."

Sizes above 12-8 made only to order, and furnished only in our C. E. Jennings' L'Hommedieu Brand.

In Sets, 29½ quarters, 1 each, 6, 7, 8, 10, 12, 16-8ths (six Augers).....\$12.00 per set.

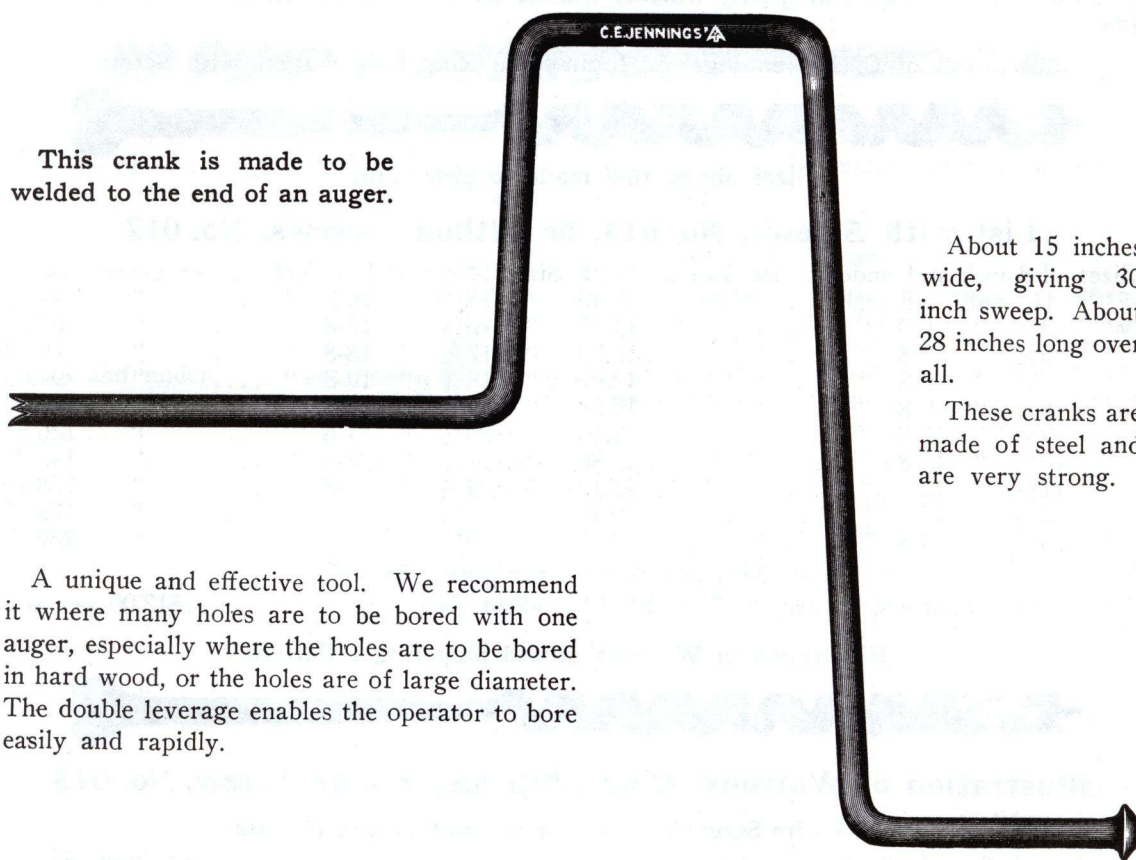

The above Augers are designed especially for boring *hard wood*. In ordering *be particular* to state whether wanted *with* or *without* screws.

Packed one-quarter dozen in package.

## Ship Auger Cranks or Double Sweep Braces for Ship Augers

This crank is made to be welded to the end of an auger.

About 15 inches wide, giving 30 inch sweep. About 28 inches long over all.

These cranks are made of steel and are very strong.

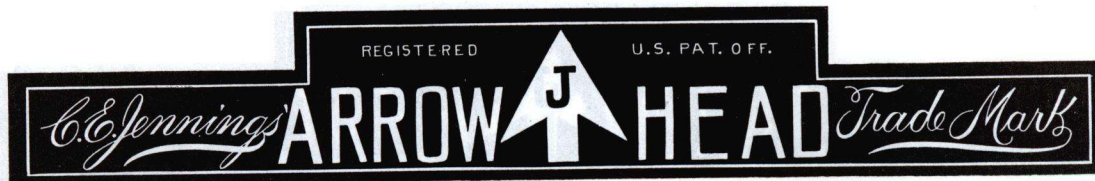

A unique and effective tool. We recommend it where many holes are to be bored with one auger, especially where the holes are to be bored in hard wood, or the holes are of large diameter. The double leverage enables the operator to bore easily and rapidly.

Illustration of Auger to the end of which the Crank is welded

Price of Ship Auger Cranks.....per dozen, \$9.00

Put up in packages of one quarter dozen.

## Ring Augers

### No. 39—Extra Long

Extra fine quality. Barrel Eye Twist, 7½ to 8 inches. Total length, 24 inches. Anti-rust; Black finished twist; polished shanks and edges.

|         | \$44.00 |       | 54.00 | 96.00 |       | per dozen. |       |            |

### No. 43C—Short

Anti-rust black finish in the twist, polished edges.

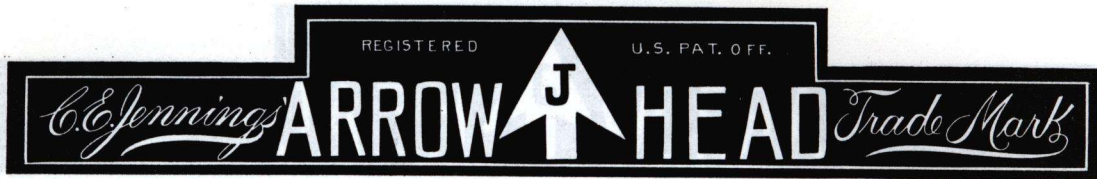

|         |       |       |       |       |       |       |       |            |
|---------|-------|-------|-------|-------|-------|-------|-------|------------|
| 3/8     | 1/2   | 5/8   | 3/4   | 7/8   | 1     | 1 1/8 | 1 1/4 | inch.      |
| \$10.00 | 11.00 | 12.00 | 13.00 | 14.00 | 15.00 | 16.50 | 18.25 | per dozen. |
| 1 3/8   | 1 1/2 | 1 5/8 | 1 3/4 | 1 7/8 | 2     | 2 1/8 | 2 1/4 | inch.      |
| \$20.00 | 22.75 | 24.50 | 26.75 | 28.00 | 30.00 | 32.00 | 34.00 | per dozen. |

Note. We strongly recommend the black finish in the twist for all boring tools, as the black finish prevents rust.

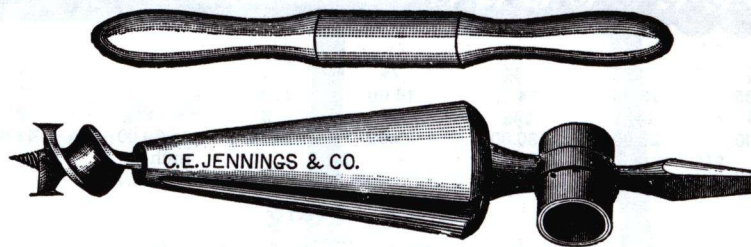

Packed one-quarter dozen in package.

These augers are ground to size and carefully made throughout. They are not intended to compete with the cheap augers now on the market.

## Tap Borers

### C. E. Jennings' Robbins' Pattern, No. 10

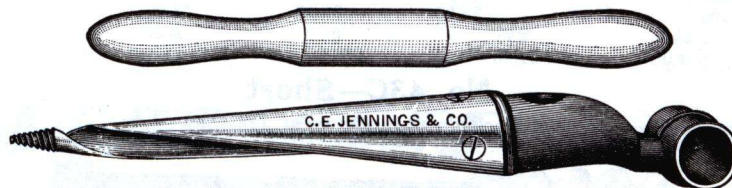

Made with Steel blade, with extra Cast Steel Bit and Wooden Handle, but can also be used with a Brace if preferred.

No. 10. Boring from  $1\frac{1}{8}$  to 2 inches.....per dozen, \$24.00

Boxes of one each

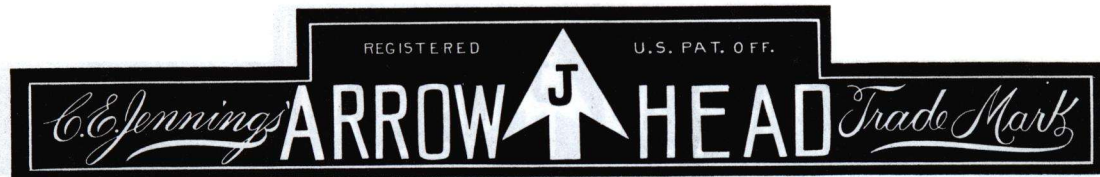

### C. E. Jennings' New Pattern, No. 6

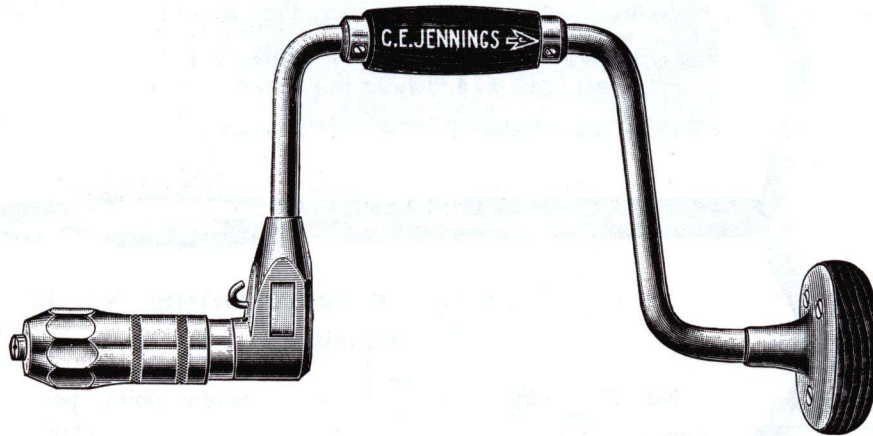

No. 6. Boring from 1 to 2 inches.....per dozen, \$11.00

The heads are best Malleable Iron, and blades are made of Steel.

Boxes of one each

## Nickel Plated Ratchet Braces

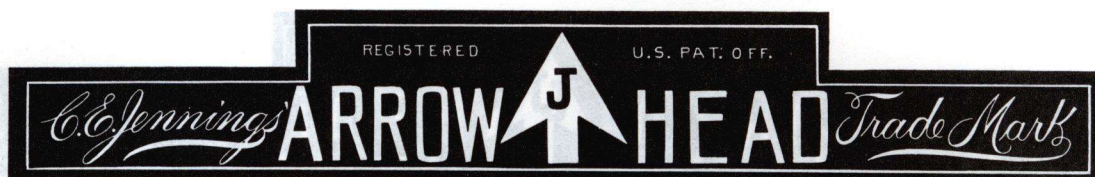

Head—Polished Cocobola Steel Clad. It is attached to the sweep by means of a steel quill that revolves on Frictionless Roller Bearings. The Rollers revolve between Hardened Steel Washers.

Handle—Polished Cocobola with brass Bushings inserted in the ends to prevent it splitting. It revolves on the Adjustable Tapered Steel Collar. By means of the set screws any looseness from wear may be instantly taken up. The ends of the Handle bear on the Tapered Shoulders of this Adjustable Collar and not on the Sweep.

Ratchet—Simple in construction, easily operated, strong and durable. The Ratchet Teeth are cut on the end of the Steel Body that revolves in the Socket attached to the Sweep and are *concealed* and protected by the Socket. The Ratchet Pawls are Solid Blocks of Steel fitting squarely into the Teeth.

Paper boxes of one-quarter gross

## Pyramid Stands

No. 10. Pyramid Stand only.....price each, \$0.75

This stand is very convenient for bench use for all kinds of small tools, such as Screw Driver Bits, Countersinks, Square Reamers, Gimlet Bits, etc. It will also hold a full set of Auger Bits.

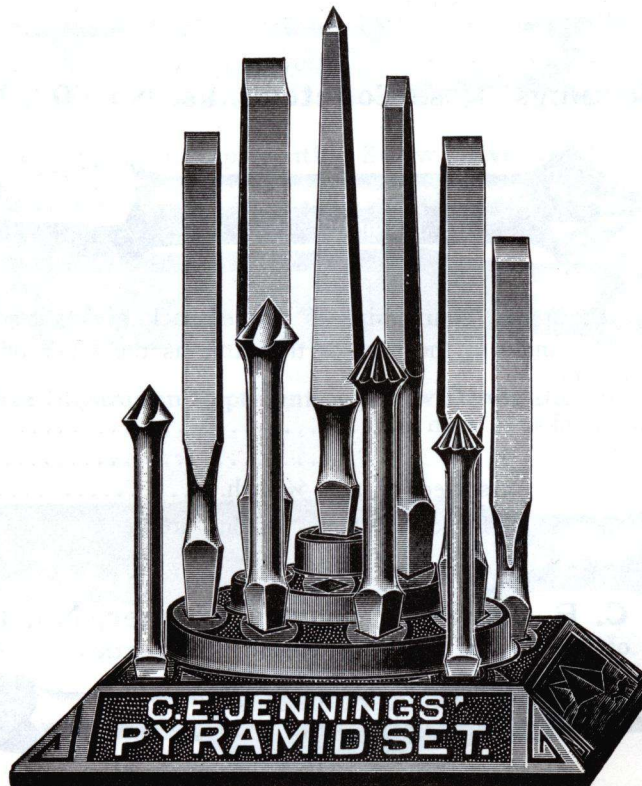

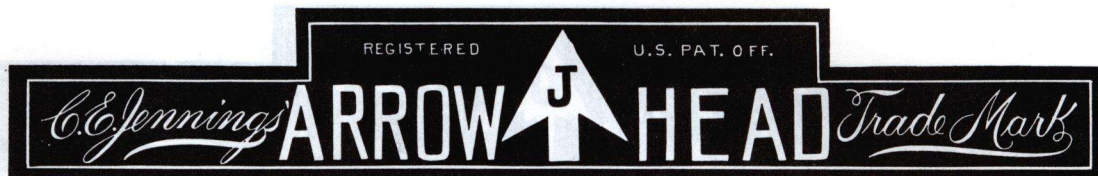

Illustration of Pyramid Set No. 11

No. 11. Pyramid Set, comprising 2 C. E. Jennings' Screw Driver Bits each. Nos. 100, 200 and 300. 1 C. E. Jennings' Rose Countersink No. 002 each  $\frac{1}{2}$  inch and  $\frac{5}{8}$  inch; 1 C. E. Jennings' Snail Countersink No. 001 each  $\frac{1}{2}$  inch and  $\frac{5}{8}$  inch; 2 C. E. Jennings' Square Reamers, No. 6 and 1 Pyramid, No. 10.....price per set, \$3.50

Packed one set in a box

## Small Tools

### C. E. Jennings' Snail Countersinks, No. 001, for Wood

These countersinks are of improved Pattern with double cutters. Each of the cutting edges has a taper clearance from the cutting edge, back. This insures a clear, sharp cut. The head is tapered on the same angle as a screw head thereby insuring a snug fit.

### C. E. Jennings' Rose Countersinks, No. 002, for Metal

Each separate tooth in this countersink is beveled back, giving it a clearance same as that on a milling cutter. The angle of the head is the same as the taper on the head of a screw, thereby insuring a snug fit.

## Nail Sets and Punches

### Knurled Pattern, with Cup Points

These Nail Sets are made with the same care as are all Arrow  Head Tools. We furnish them either polished or blued.

Assorted Medium (2 each, 2 and 5; and 4 each, 3 and 4-32 inch) in plain box, per dozen, \$1.50

No. 1½ is our polished nail set. No. 2½ is our blued nail set. In ordering specify whether No. 1½ or No. 2½ is wanted. The list is the same on each.

Size 2, 3, 4 and 5-32 inch in plain boxes.....per dozen, \$1.00

With these tools a nail can be set or drawn out at any angle, without splitting the head. Nails bent in driving can be straightened with them, and then set. Screws with worn or broken heads, can be easily backed out with these sets. Made of the best Tool Steel and fully warranted.

Assorted Small (4 each 2, 3, and 4-32 inch), in plain box.....per dozen, \$1.00

### Knurled Center Punches, No. 42

Best Cast Steel.  $\frac{3}{8}$  in. diameter

Price in plain boxes.....per dozen, \$1.50

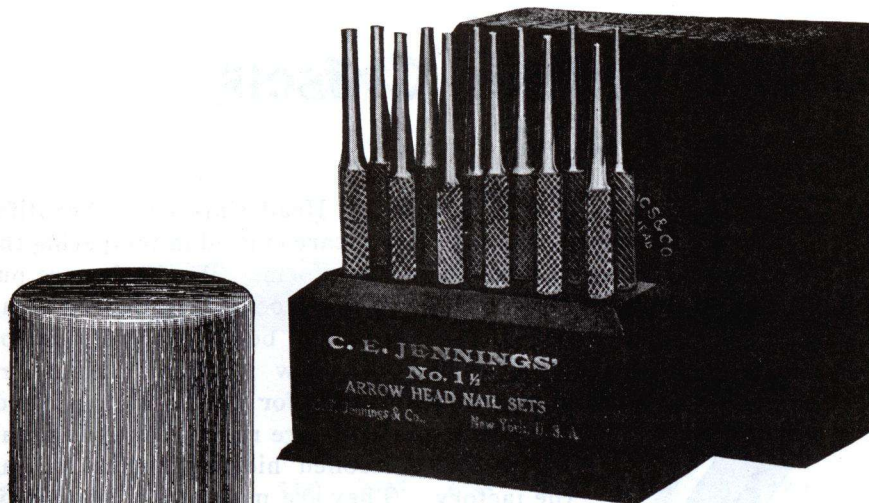

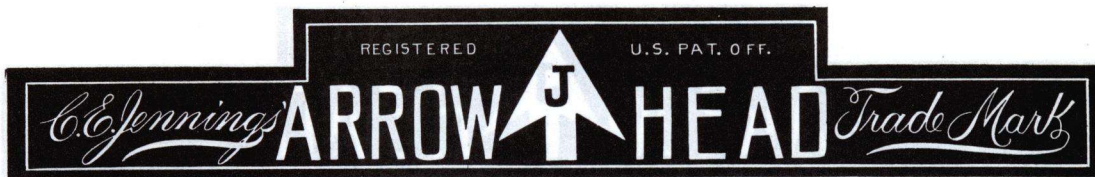

### Knurled Prick Punches, No. 43

$\frac{3}{8}$  in. diameter

Price in plain boxes.....per dozen, \$1.50

All of the above tools are packed one dozen in a box

## Socket Firmer Chisels

### No. 70

C. E. Jennings' No. 70 Arrow  Head Chisel is a beautiful tool, and fully warranted. Great care is used in tempering the blades to get them hard and uniform. The blades are put through an *extra* straightening process, just before being finished-forged, to insure their being perfectly flat on the face. Our No. 70 Arrow  Head Chisels are ground and honed, ready for use, and are handsomely finished. They are rigidly inspected, and are tested in seasoned hickory before leaving the factory. They are made with broad beveled edges, which enables the mechanic to sharpen them with greater ease than he can the ordinary plain edge chisels, or the cheap *so called bevel-edged* chisels with a *narrow bevel*. They are fitted with hand finished patented handles, with leather caps to prevent the handle from splitting.

## Chisel Set

### No. 71

Beveled Edges. Special Leather Tipped Handles, Patented

This set contains our No. 70 Chisels. Separate sizes are listed on page 50.

We consider this the handsomest and best chisel set ever placed on the market.

This cut represents No. 71 Chisel Set, containing one No. 70 chisel each  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ ,  $\frac{3}{4}$ ,  $\frac{7}{8}$ , 1,  $1\frac{1}{4}$ ,  $1\frac{1}{2}$ ,  $1\frac{3}{4}$  and 2 inches, packed in our improved Chisel Cabinet. The Blades are ground sharp and honed, ready for use. Each Chisel is tested in hard wood before leaving the factory.

Price, complete.....per set, \$10.00

The blades of all our Chisels are made of selected Tool Steel, tempered by an improved process.  
Weight, per set,  $11\frac{1}{2}$  lbs.

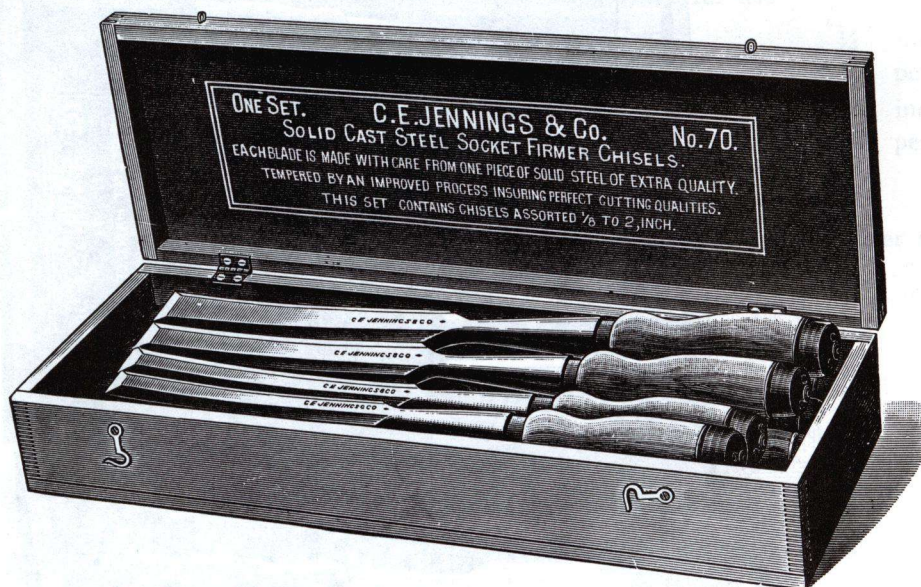

Full cases contain 10 sets and weigh about 115 lbs. net or 150 lbs. gross  
Measure  $26 \times 22\frac{1}{2} \times 14\frac{1}{2}$  inches.

## Socket Firmer Chisel Sets

Beveled Edges. Special Leather Tipped Handles

The blades are made from selected Tool Steel, ground sharp and honed; the handles are hand finished and patented. Each Chisel is tested in hard wood before leaving the factory. Separate sizes of these Chisels are listed on page 50.

### Assorted in Sets as Follows:

|                 |                      |                                   |       |   |  |        |
|-----------------|----------------------|-----------------------------------|-------|---|--|--------|
| <b>No. 70</b>   | contains 12 Chisels, | $\frac{1}{8}$ to 2                | inch, | 1 each,   | $\frac{1}{8}$ , $\frac{1}{4}$ , $\frac{3}{8}$ , $\frac{1}{2}$ , $\frac{5}{8}$ , $\frac{3}{4}$ , $\frac{7}{8}$ , 1, $1\frac{1}{4}$ , $1\frac{1}{2}$ , $1\frac{3}{4}$ , 2. | \$9.00 |
| <b>No. 70-8</b> | " 8                  | " $\frac{1}{4}$ to 2              | " 1   | " $\frac{1}{4}$ , $\frac{3}{8}$ , $\frac{1}{2}$ , $\frac{3}{4}$ , 1, $1\frac{1}{4}$ , $1\frac{1}{2}$ , 2. | 6.25   |        |
| <b>No. 70-6</b> | " 6                  | " $\frac{1}{4}$ to $1\frac{1}{2}$ | " 1   | " $\frac{1}{4}$ , $\frac{1}{2}$ , $\frac{3}{4}$ , 1, $1\frac{1}{4}$ , $1\frac{1}{2}$ .                    | 4.80   |        |

These Chisels are same quality as those in our No. 71 Sets.

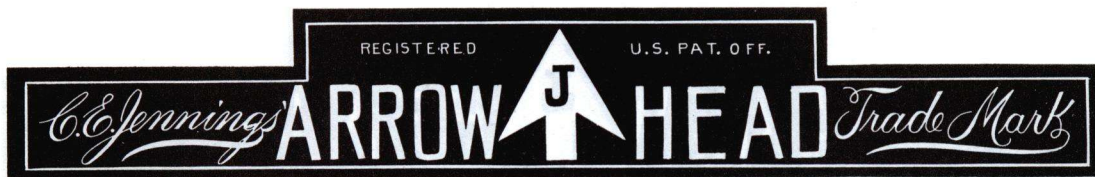

All the above sets are packed in well finished tool boxes, per the above illustration. We originated this improved method of packing our Chisels—other makers have adopted a somewhat similar box. In order to get our Arrow  Head tools, always order by name and number.

No. 70-12. Weight per set,  $9\frac{1}{4}$  lbs.

Full cases contain 12 sets and weigh about 135 lbs. gross or 111 lbs. net

Patented Leather Tipped Chisel Handles for the above Chisels in sets,  $\frac{1}{8}$  to 2 inches, or separate sizes.....per dozen, \$2.40

Packed in paper boxes of one dozen

## Short Socket Firmer Chisels

Ground Sharp and Honed and Fully Warranted. Light, Short, Convenient to Use.

Blades average  $3\frac{1}{2}$  inches long from Shoulder; Sockets and Handles in proportion.

This Chisel is particularly adapted for light work such as putting on trim, etc., and for use where the mechanic wishes to get down close to the work. In such cases it is superior to a long, clumsy chisel. It is also adapted for Manual Training and amateur's use. As a household Chisel it is unequalled.

This illustration represents No. 01 and No. 04

## Short Socket Firmer Butt Chisels

These Chisels are forged from tool steel and fully warranted. They are especially adapted for putting on Butts, etc., enabling the mechanic to get close to his work and for this purpose are handier than the long Chisels. They are furnished with Plain or Beveled Edges and with special handles, either plain or leather tipped. Ground sharp and honed ready for use.

Average length of Blade to Shoulder  $3\frac{3}{8}$  inches; length over all 10 inches.

## Drawing Knives

### No. 43

Plain Handles, 4-inch Blade.

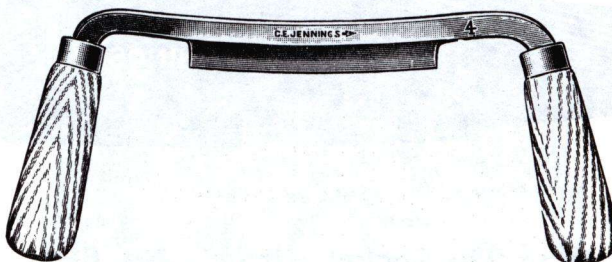

These drawing knives are made of tool steel, ground sharp and honed. They are designed especially for Manual Training Schools, Pattern makers' use and for those who want a short, light blade, instead of a long, heavy blade.

No. 43 .....per dozen, \$8.00

### No. 44

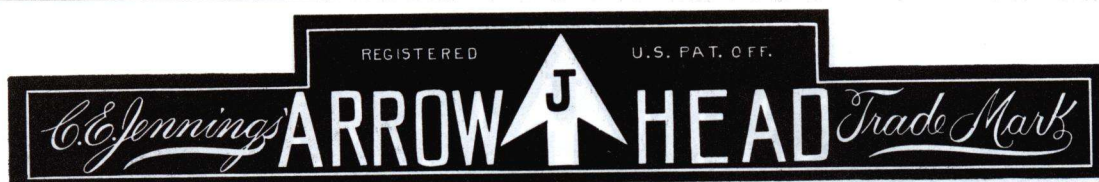

Cocobola or Rosewood Handles, 4-inch Blade.

Our No. 44 Drawing Knife is the same in general design as our No. 43, only having handsome Cocobola or Rosewood Handles in place of plain handles. It is, we believe, the handsomest small drawing knife made.

No. 44 .....per dozen, \$12.00

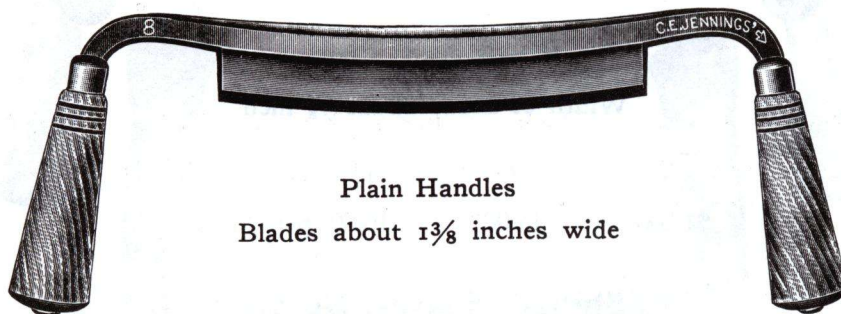

Packed in boxes of one-half dozen

## Drawing Knives

This line of Rigid Handle Drawing Knives is the handsomest and best on the market both as to quality and to workmanship. No pains spared to make them the best in the world. They are ground sharp and honed ready for use.

The handle is held firmly in place by the Knurled Thumb Nut pressing the handle shank (which is provided with a tapered angular opening), against the shank of the blade, which has a bolt with a taper corresponding to that of the opening in the shank.

Packed in cartons of one each

## Folding Handle Drawing Knives

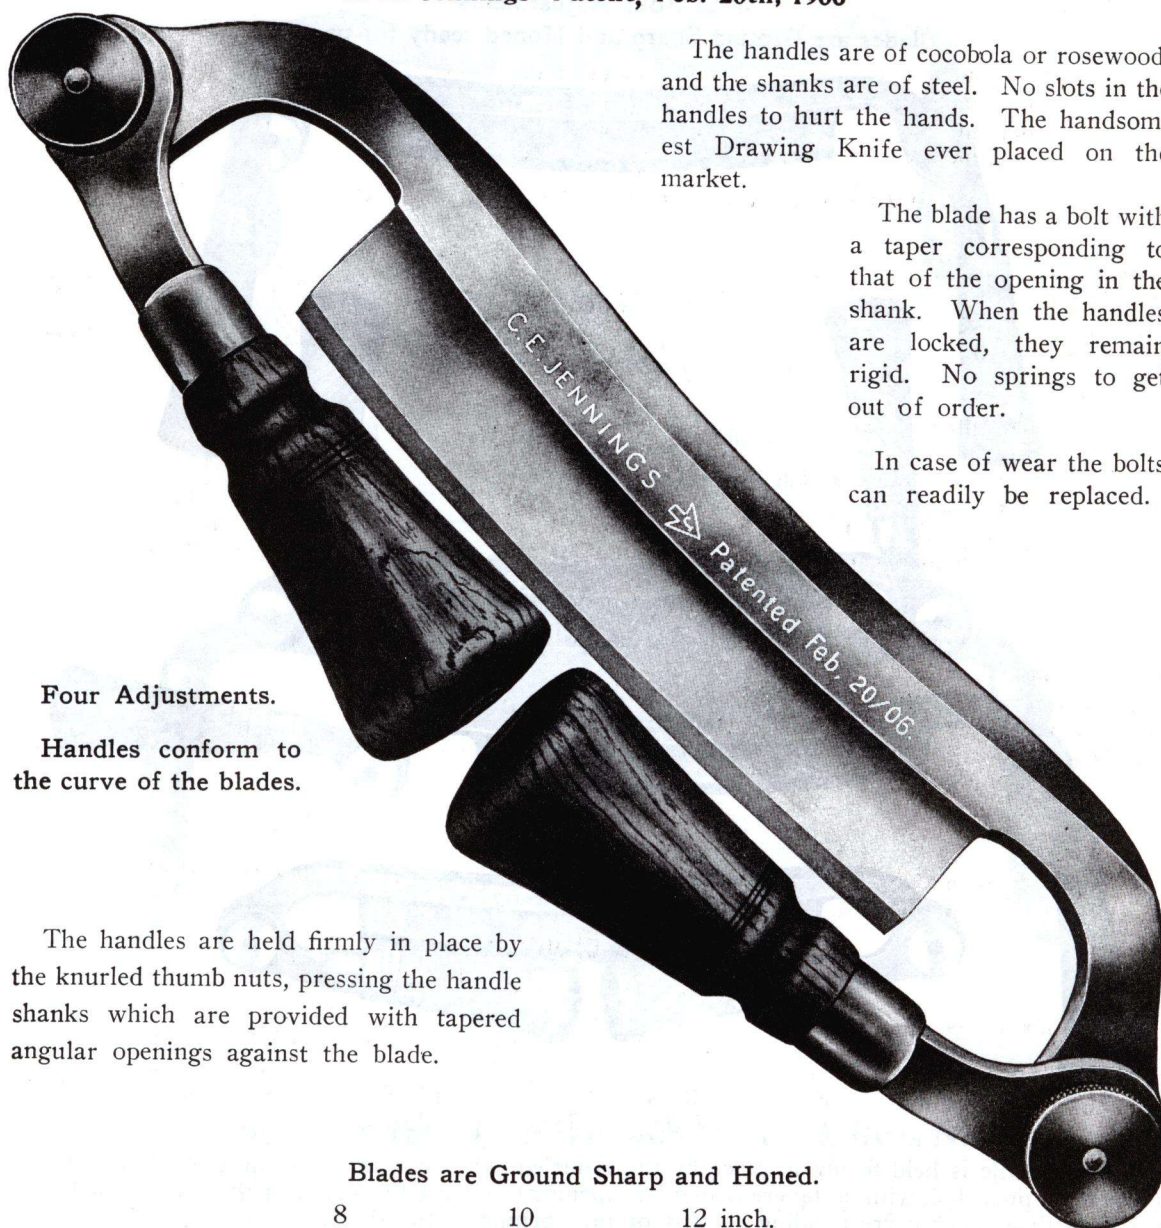

No. 66

A. B. Jennings' Patent, Feb. 20th, 1906

The handles are of cocobola or rosewood, and the shanks are of steel. No slots in the handles to hurt the hands. The handsomest Drawing Knife ever placed on the market.

The blade has a bolt with a taper corresponding to that of the opening in the shank. When the handles are locked, they remain rigid. No springs to get out of order.

In case of wear the bolts can readily be replaced.

Four Adjustments.

Handles conform to the curve of the blades.

The handles are held firmly in place by the knurled thumb nuts, pressing the handle shanks which are provided with tapered angular openings against the blade.

Blades are Ground Sharp and Honed.

## Screw Drivers

### New Pattern, No. 185

Full Polished. Nickel Plated Ferrules. Handsome Black Handles

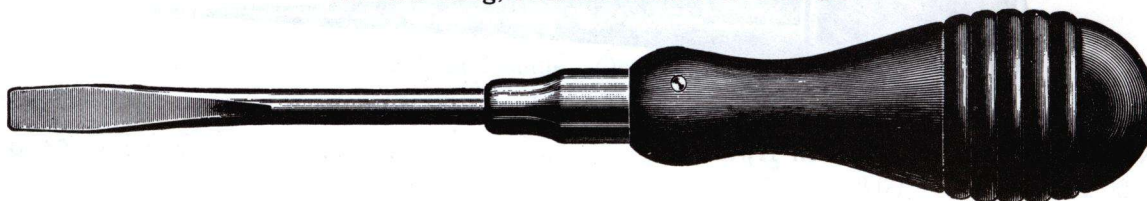

▲ See the Point?

Our No. 185 New Pattern Screw Drivers are made with EXTRA HEAVY FORGED BLADES, riveted through a heavy nickel plated steel ferrule. The points are CONCAVED and CROSS GROUND to prevent SLIPPING. Each screw driver is fully warranted.

|                   |               |               |                |                |               |               |               |               |            |

## Hand-made, Hand Panel and Rip Saws

### No. A 7 1-2 Straight Back, Narrow Blade

Carved Handle, Full Polished, Full Bevel, Hand Filed. This Saw is 6 inches wide at butt, 1½ inches at point (26-inch Saw), and is ground thin on back. It will therefore run with very little set and has the advantages of a saw worn narrow by use combined with the superiority of a new Saw; mechanics like an old worn Saw to use. This might be termed a "New Old Saw."

|         |       |       |       |       |       |            |

| \$15.00 | 17.00 | 19.00 | 21.00 | 22.00 | 25.00 | per dozen. |

Packed in boxes of one-third dozen

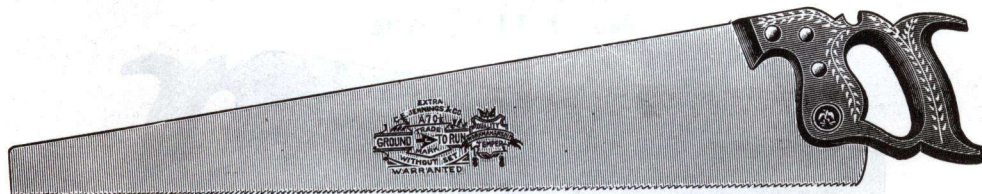

### No. A 70 1-2 Straight Back, Narrow Blade

A masterpiece of the sawmaker's art

**MADE TO RUN WITHOUT SET**

For close joints and smooth cutting. Excellent for Pattern Maker's use.  
Inside finishing, mitre box cutting, etc.

We guarantee this saw to run without set and consider it the best Hand Saw made for this purpose. The Blade being narrow (6 inches wide at the butt, 1½ inch at the point) runs with less friction than a saw with wide blade. The grinding adapts it to run without set. The teeth, however, are regularly shaped and filed and may be set if the mechanic so wishes. This gives this Saw an advantage over one that cannot be set. The handle is made of carved apple wood and the saw is beautifully finished. We recommend this saw in fine teeth—Hand and Panel sizes 10, 11 and 12 points. Rip not coarser than 6 points.

Paper boxes of one-third dozen

## Hand-made, Hand Panel and Rip Saws

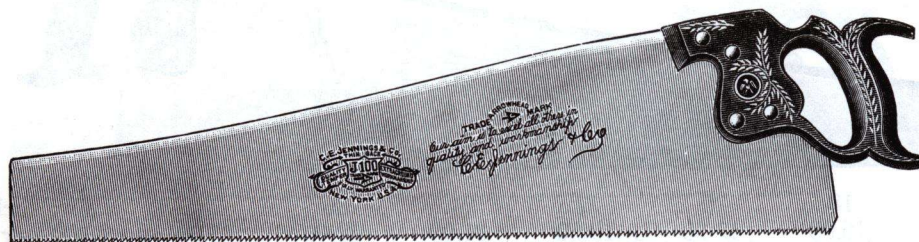

Wide blade skew back, special grinding. Apple handle, polished and carved, set close up and with five improved brass screws in 26 inch size; and above 26 and 28 inch Rip Saws with thumbhole in handle. These saws are hand smithed, hammered and blocked, and full bevel hand filed, and set by hand ready for use. Fully guaranteed in every particular.

## Ship Carpenter's Saw, No. 7 1-2

Extra refined spring steel, taper ground, thin back, selected blades, beech handles, extra quality, four improved brass screws.

## Carpenter's Nail Cutting Saw, No. 10

This Saw will cut nails, spikes, bolts, soft sheet metal, lead pipe, brass tubing, etc. It will cut wood also, though not so rapidly as a regular Hand Saw. For cutting nails embedded in wood, in old work, it is desirable, saving the regular Hand Saw which is not designed for such work. An excellent saw for plumbers' use and for cutting metal roofing. High temper, but can be filed. Runs without set.

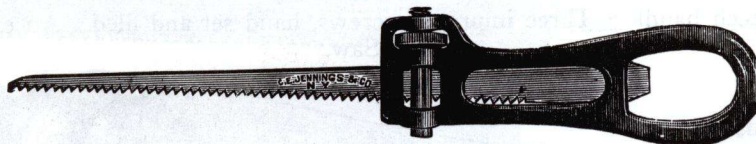

| Length (inch.) | Price per dozen |
|----------------|-----------------|
| 18             | \$20.00         |
| 20             | 22.00           |

Packed in boxes of one-third dozen

## C. E. Jennings' Model Keyhole Saw and Pad No. 24

Adjustable Iron Handles

The Saws pass through a slot in the centre of the brass bolt in the front of the handle. The lower end of slot has a notch to hold the Saw tooth, which will not damage the saw, but prevents its slipping when nut is tightened.

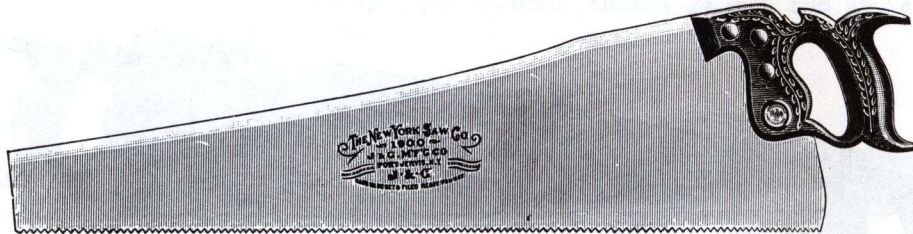

### Iron Handles Complete with C. E. Jennings' Best Blades

## Combination Set of Saws, No. 11

with the Garland Adjustable Handle.

Comprising one Keyhole Saw Blade, 12 inch; one Compass Saw Blade, 14 inch; one Panel Saw Blade, 18 inch; and one Garland Adjustable Handle.

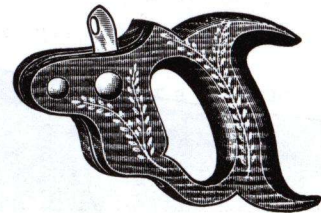

18 inch Hand or Panel Saw Blade

14 inch Compass Saw Blade

12 inch Keyhole Saw Blade

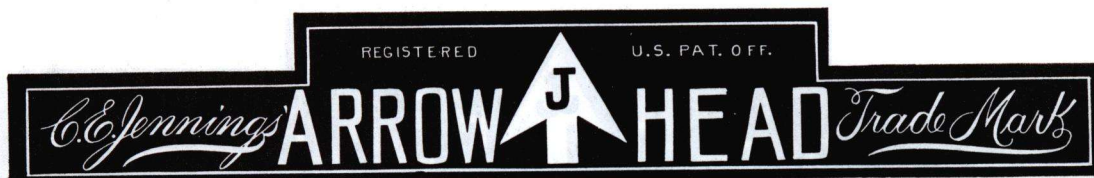

Garland Adjustable  
Handle

Price per dozen sets, \$24.00

The feature of this handle is the adjustable lever that operates the screw which holds the blade. The blade may be instantly removed from the handle without the use of a screw driver and another blade put in place. A screw driver may be used, however, if it is desirable to tighten the screws. As but one handle is required for each set and this handle is so easily taken off these sets are convenient for those who wish to carry a set of saws in a small space for light jobbing work, etc.

The saws are taper ground and hand filed and fully warranted.

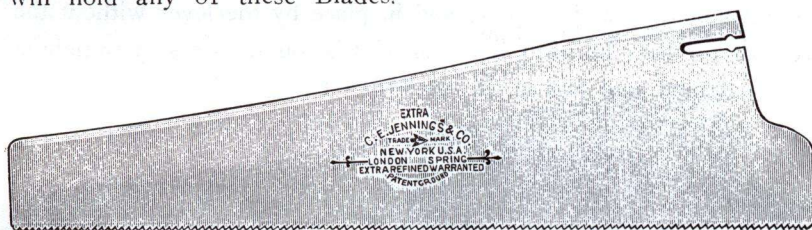

Packed one set in box or carton

## Combination Set of Saws, No. 12

With the Garland Adjustable Handle.

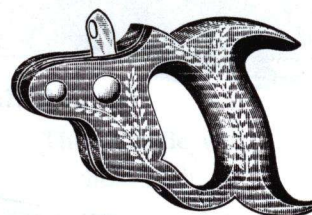

Comprising one Keyhole Saw Blade, 12 inch; one Compass Blade, 14 inch; one Panel Saw Blade, 18 inch; one Rip Saw Blade, 18 inch and one Garland Adjustable Handle which will hold any of these Blades.

18 inch Hand or Panel Saw Blade

18 inch Rip Saw Blade

Garland Adjustable Handle

14 inch Compass Saw Blade

12 inch Keyhole Saw Blade

Price per dozen sets. .... \$36.00

The feature of this handle is the adjustable lever that operates the screw which holds the blade. The blade may be instantly removed from the handle without the use of a screw driver and another blade put in place. A screw driver may be used, however, if it is desirable to tighten the screws.

The blades are taper ground, hand filed and fully warranted.

Packed one set in box or carton

## Combination Set of Saws, No. 13

with the Garland Adjustable Handle.

This set of saws comprises five blades, one Keyhole Saw Blade, 12 inch; one Compass Saw Blade, 14 inch; one Metal Cutting Blade, 15 inch; one Panel or Hand Saw Blade, 18 inch and one Rip Saw Blade, 18 inch. These blades are hand filed and fully warranted. Each of the blades may be instantly inserted in the handle and locked in place by the lever without the aid of a screw driver. A screw driver may be used, however, if it is found necessary to tighten the blade. A desirable set for mechanics' and household use.

## Dovetail Saws and Brass Back Metal Saws

### C. E. Jennings' Dovetail Saws, No. 50

Improved Pattern, Brass Backs, Ebonized Handles

1¼ to 1⅝ inches wide under the back, according to size.

Extra quality spring steel, hand smithed and filed, and intended for fine dovetailing and musical instrument work. The blades are No. 24 gauge and 19 teeth to the inch.

|        |      |      |       |            |
|--------|------|------|-------|------------|
| 3      | 4    | 5    | 6     | inch.      |
| \$7.00 | 8.00 | 9.00 | 10.00 | per dozen. |

### C. E. Jennings' Brass Back Metal Saws, No. 51

8 inches long, 1¼ inches wide under the back.

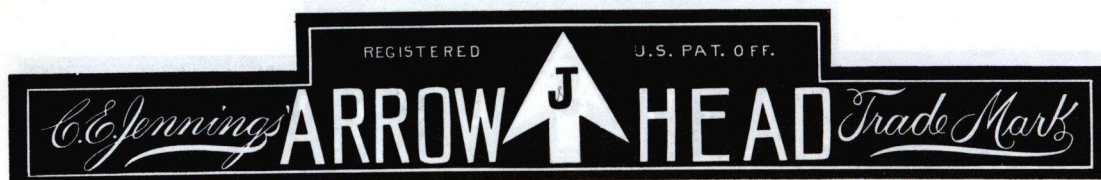

Made of special tempered steel. Blades ground very thin. Ebonized handle.

May be used by automobilists for sawing copper tubing or parts about an automobile that a wide hack saw cannot reach for want of space to work in; also for use about launches, etc. Makes a finer cut than a regular hack saw. Excellent for buhl work—cutting curtain rods, etc.

Price per dozen..... \$13.00

Packed in boxes of one-third dozen

## Pruning Saws

## Nickel Plated Extension Hack Saw Frames and Hack Saw Outfits

In placing our Arrow  Head Hack Saw Frame Outfits on the market, it has been our aim to provide the mechanic not only with one blade, but with a full set of our Arrow  Head Hack Saw Blades, so that he may have at hand a blade for every purpose.

No. 1751

Illustration of No. 175 Saw Frame with one 8 inch Blade

Our No. 175 Hack Saw Frames are made to extend, so as to take in 8", 9", 10", 11" and 12" blades. They are also instantly adjustable, so that the blade can be turned at right angles to the frame. The end clip and end shank are square, which insures the blade running true. The back of our frames are solid; having notches on the under side, they are much stronger and more rigid than those with holes through the back.

| " 0430.   | 10 "   | ..... | " 5.90            |

These Frames are all well finished, strong and durable, and are quickly and easily adjusted to four angles. Many mechanics insist on having an iron frame on account of its rigidity. We consider our No. 430 Frames to be the best iron frames on the market.

Packed in boxes of one-half dozen. Cases contain one-half gross

## Hack Saws and Outfits

Japanned Iron

Illustration represents No. 408, 8 inch

MADE ONLY IN 8 INCH SIZE

These frames are made of iron and are very rigid. The tension on the blade is taken up by a thumb screw at the end of the frame which operates upon a bolt. One end of this bolt is round and the other end square. The square end of the bolt runs through a square hole in the end of the frame. This square hole insures the blade being drawn straight when tightened. By loosening the thumb-nut sufficiently, the round end of the shank will turn so that the blade may be set at right angles to the frame, if desired. This makes a good frame at a low price.

No. 408-8 inch, Japanned Iron, complete with one blade,

price per dozen, \$ 3.50

No. 13408-8 inch, Japanned Iron, complete with 13 blades,

price per dozen, 11.50

Note. Unless otherwise specified, where frames are ordered with 13 blades we will assort them with fine, medium and coarse teeth so the mechanic will have a blade for every purpose.

Packed one-half dozen in a box; one-half gross in a case

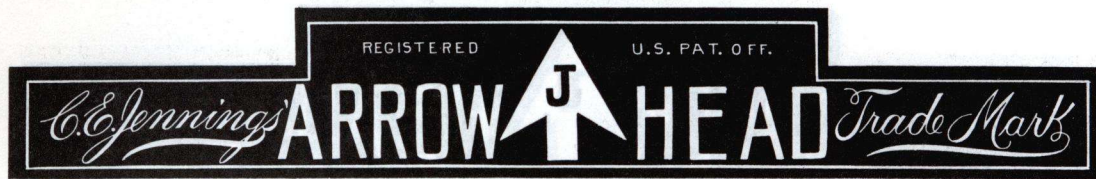

Weight of No. 408-8 inch per half-gross, in case,

60 lbs. gross, 50 lbs. net.

Weight of No. 13408-8 inch with 13 blades, in case,

65 lbs. gross, 60 lbs. net.

Measurement of case, 24" x 14½" x 16".

### Wire Frame Hack Saw

Illustration representing No. 151 Frame

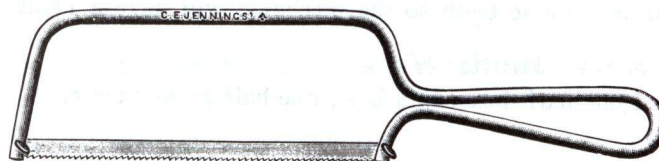

These saws are especially adapted for cutting iron, brass, steel, lead pipe, metals of all kinds, curtain rods, ham bones, etc. It is indispensable in the carpenter's kit, around the farm or in the house. The blade may be removed when worn out and be replaced by a new one at less cost than for filing an old one. In removing the blade, place the end between the jaws of a vise or between two nails driven into a board or bench and by bending the frame slightly the pieces may be instantly removed and a new blade inserted.

Nos. 250 and 251 are packed  $\frac{1}{2}$  dozen in a box.

### Jewelers' Nickel Plated Hack Saw, No. J 150

- |   |                   |
|---|-------------------|
| 6-inch, complete with one blade (half dozen in a box) .....       | per dozen, \$3.15 |
| Extra jewelers' blades for above Saws (half gross in a box) ..... | per gross, 9.00   |

## Information Regarding Hack Saw Blades

These blades are made of high carbon tool steel. The teeth are *milled*, not *punched*, except on the 30 teeth blades, these being so fine that it is not practicable to mill them. The teeth are set by a new and patented process and the blades are hardened by a method attained after many years of experimenting. They are the toughest, least liable to breakage, and we believe the best cutting and longest wearing blades on the market.

In order to insure the mechanic against substitution of other blades and in order to make sure that he receives the proper blade for the various kinds of work we pack these blades in *different colored boxes* of one dozen blades in a small box; and six small boxes in a carton. The colors are as follows:

**GREEN AND WHITE** indicates **14 TEETH**, for **fast, deep and heavy cutting**; also for cast iron and machinery steel.

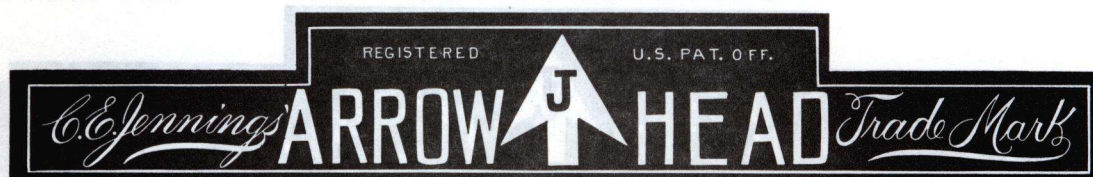

**RED AND BLACK** indicates **16 TEETH**, an intermediate blade between the 14 and 18 teeth.

**BLACK AND YELLOW** indicates **18 TEETH**. Particularly adapted for tool steel, solid brass and thick pipe.

**BLUE AND WHITE** indicates **24 TEETH**. for tubing and for thin sheet metals.

**BROWN AND WHITE** indicates **30 TEETH**, for nickel plated tubing.

These boxes are also a help to the dealer as he can tell at a glance by the color of the box just what kind of blade to give his customer.

## Information Regarding Hack Saw Blades

The following illustration shows how our Arrow Head Blades are packed, 1 dozen in a small box and half gross in an outside carton.

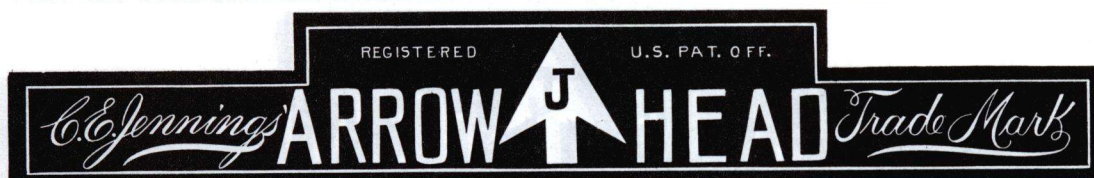

### HACK SAW "DONT'S"

- ⬆ Don't use a coarse blade on light sheet metal or tubing.
- ⬆ Don't use a fine blade on cast iron or for heavy work.
- ⬆ Don't use oil on your blades.
- ⬆ Don't start your saw under heavy pressure. Start to cut light. Increase the pressure as the blade wears.
- ⬆ Don't start a new blade in a cut made by an old one.

### Points to be Remembered

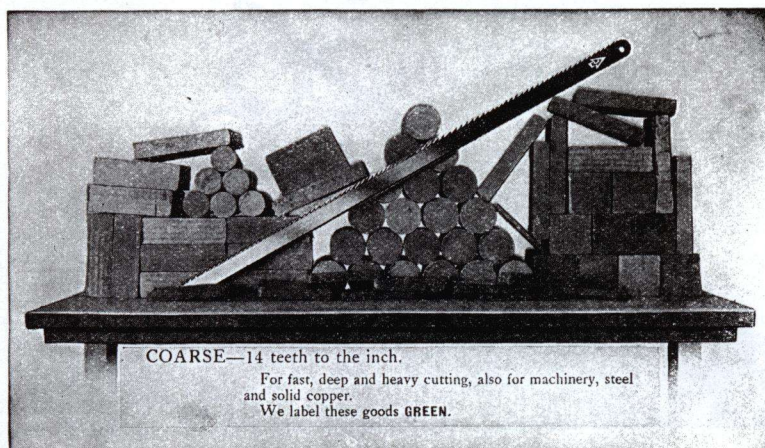

We invite comparison. But remember: "A carpenter would never think of using a cross-cut saw to rip a board, nor a rip saw for cross-cutting. Much less should the mechanic use a fine tooth blade where he ought to use a coarse one, and *vice versa*. **BE SURE** in comparing our blades with those of other makers that you compare blades having a **LIKE NUMBER OF TEETH**.

## Milled Tooth Hack Saw Blades, No. 1 1-2 14 Teeth

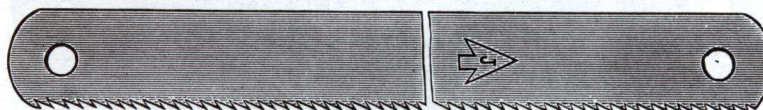

For Fast, Deep and Heavy Cutting; also for Cast Iron Machinery, Steel and Solid Copper

We Pack our 14-TOOTH Blades in GREEN and WHITE Boxes

This illustration shows the actual work done with one Arrow Head Hack Saw Blade, 14 Teeth

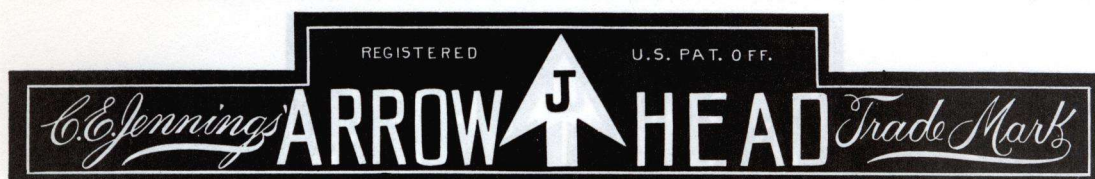

### 14 Tooth Hand Blades for Heavy Cutting

|                |                  |                  |                   |                   |                   |                   |              |
|----------------|------------------|------------------|-------------------|-------------------|-------------------|-------------------|--------------|
| Length .....   | 8x $\frac{1}{2}$ | 9x $\frac{1}{2}$ | 10x $\frac{1}{2}$ | 10x $\frac{5}{8}$ | 12x $\frac{1}{2}$ | 12x $\frac{5}{8}$ | inch.        |
| Teeth .....    | 14               | 14               | 14                | 14                | 14                | 14                | to the inch. |
| Thickness .... | .022             | .022             | .022              | .028              | .022              | .028              | inch.        |
| List per gro.. | \$8.00           | 9.00             | 10.00             | 10.20             | 12.00             | 12.60             | per gross.   |

The above  $\frac{1}{2}$  inch wide blades are especially adapted for railroad and steel structural work such as cutting steel rails, steel beams and all heavy work. Also for machinery steel and solid copper. The 10x $\frac{5}{8}$  and 12x $\frac{5}{8}$  inch may be used by hand or machine.

Packed in carton of one dozen. Six cartons of half gross blades in large carton or container

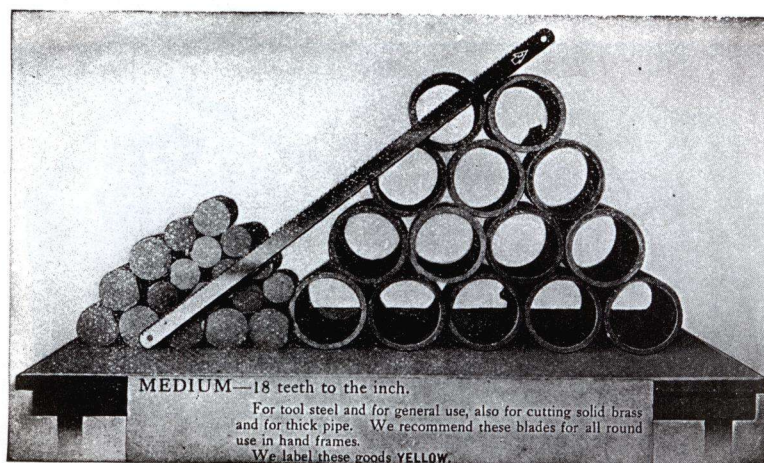

## MILLED TOOTH HACK SAW BLADES

No. 1 1-2—18 Teeth

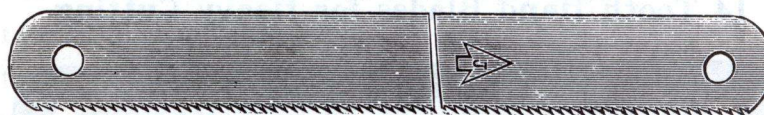

FOR GENERAL USE. Also for Tool Steel, Solid Brass and Thick Pipe

We pack our 18-TOOTH Blades in BLACK and YELLOW Boxes

This Illustration shows the actual work done with one Arrow Head Hack Saw Blade, 18 Teeth

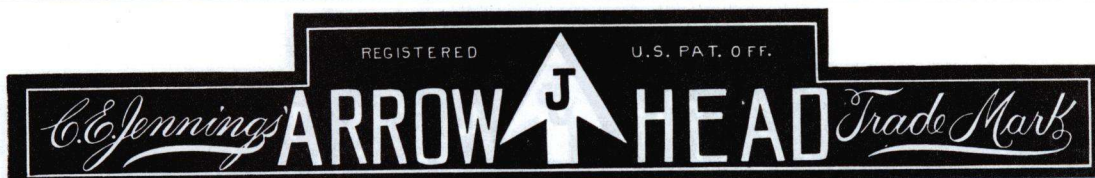

### 18 Tooth Hand Blades for all General Work

|                 |                  |                  |                   |                   |              |

| Length .....    | 8x $\frac{1}{2}$ | 9x $\frac{1}{2}$ | 10x $\frac{1}{2}$ | 12x $\frac{1}{2}$ | inch.        |
| Teeth .....     | 18               | 18               | 18                | 18                | to the inch. |
| Thickness ..... | .022             | .022             | .022              | .022              | inch.        |
| List .....      | \$8.00           | 9.00             | 10.00             | 12.00             | per gross.   |

Note.—We recommend for general use in hand hack saw frames a blade  $\frac{1}{2}$  inch wide, .022 inch thick with 18 teeth to the inch, as illustrated above. This blade is especially adapted for cutting unannealed tool steel, thick pipe and solid brass.

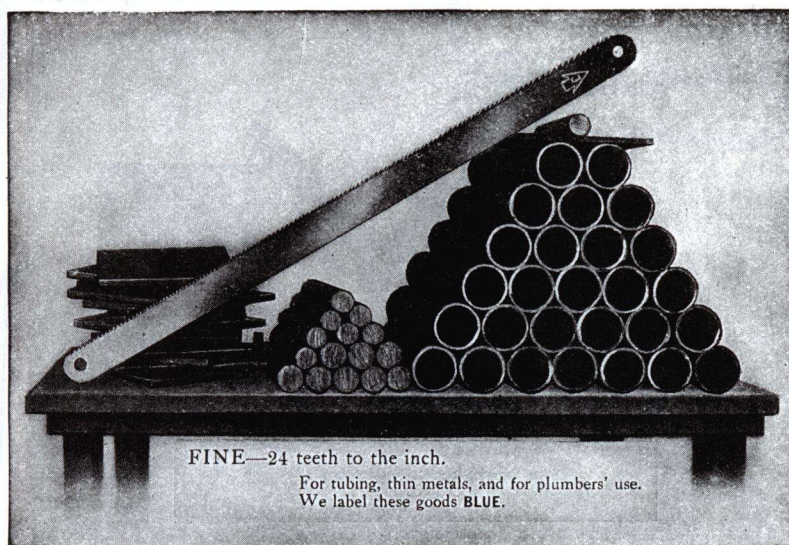

Packed in cartons of one dozen; six cartons or one-half gross of blades in a large carton or container

## Milled Tooth Hack Saw Blades, No. 1 1-2 24 Teeth

For Tubing and Thin Sheet Metals

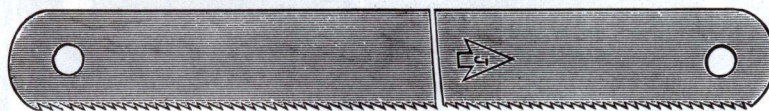

We pack our 24-TOOTH Blades in BLUE and WHITE Boxes

This illustration shows the actual work done with one 24 Tooth Blade

## 24 Tooth Tubing Saws

Arrow Head tubing Saws are especially adapted for cutting steel, copper and brass tubing and all thin sheet metals.

|                 |                  |                  |                   |                   |              |
|-----------------|------------------|------------------|-------------------|-------------------|--------------|
| Length .....    | 8x $\frac{1}{2}$ | 9x $\frac{1}{2}$ | 10x $\frac{1}{2}$ | 12x $\frac{1}{2}$ | inch.        |
| Teeth .....     | 24               | 24               | 24                | 24                | to the inch. |
| Thickness ..... | .022             | .022             | .022              | .022              | inch.        |
| List .....      | \$8.00           | 9.00             | 10.00             | 12.00             | per gross.   |

In ordering blades, it will be necessary to order by number as *All Hard* blades are numbered 1 $\frac{1}{2}$  and *Flexible* blades are numbered 2 $\frac{1}{2}$ . These numbers will be printed in plain figures on both labels and wrappers.

Note. For *nickel plated tubing*, we can furnish a 30-TOOTH blade at same list and discount as for 24-TOOTH. WE LABEL 30-TOOTH Blades BROWN and WHITE.

Packed in cartons of one dozen; six cartons or one-half gross blades in large carton or container

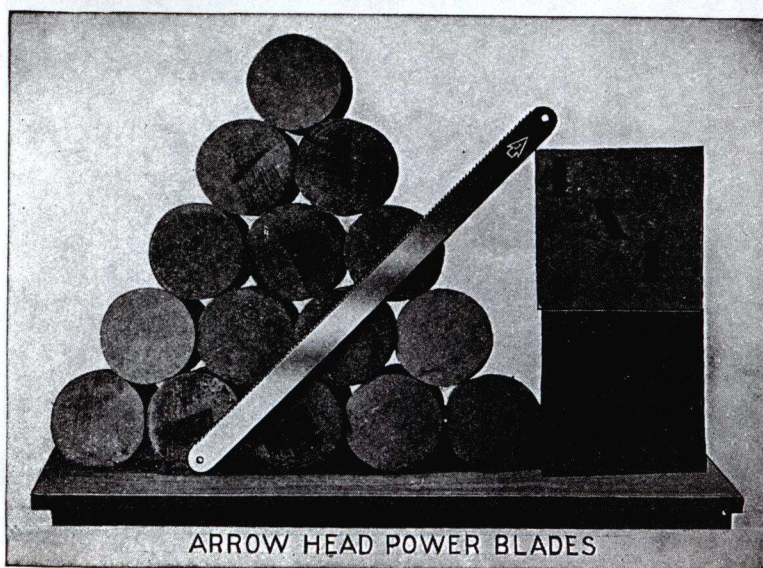

## MILLED TOOTH HACK SAW BLADES

No. 1 1-2

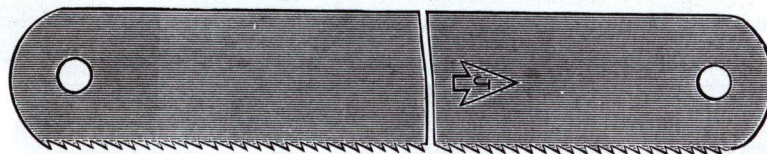

14 Teeth for Power

We label Power Blades GREEN and WHITE, similar to our other 14-TOOTH Hand Blades

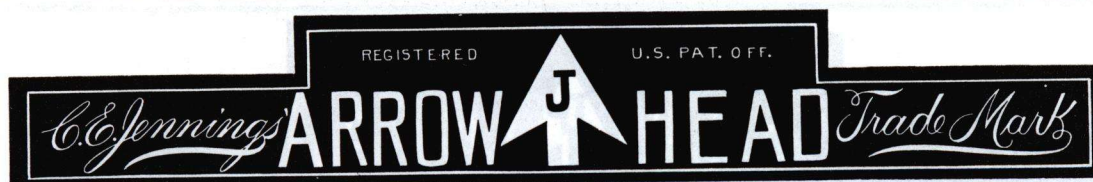

Showing actual work done

Arrow Head Special Power Hack Saw Blades for machine use will stand more speed than any other hack saw blades. On soft stock these blades can be run in the machine at 80 strokes per minute. On unannealed tool steel or hard stock 40 strokes per minute.

Extra blades with bent ends.....per gross, 1.20

Packed in boxes of one-half dozen, complete

## Take Down Squares

A. B. Jennings, Patent June 21, 1910

WARRANTED ACCURATE

This is the greatest improvement ever made in steel squares. We believe it is the simplest and best take down square made. There are no screws or locks or wrenches to bother with and the spring always keeps the square true.

### POINTS

1. Convenient to carry.
2. No screws to get loose.
3. Spring takes up play.
4. Solid shoulder insures accuracy.
5. Canvas case to protect square from rust and damage.
6. Instantly put together.
7. Will go in a space 4" x 24".

These squares are made up as follows: Body 24"x2"; Tongue, 16"; Markings,  $\frac{3}{8}$ ,  $\frac{1}{8}$ ,  $\frac{1}{2}$ ,  $\frac{1}{10}$ ,  $\frac{1}{8}$ ,  $\frac{1}{4}$ , with brace; 8 square and 1-100 scale; also Essex new Board measure giving feet and inches in full.

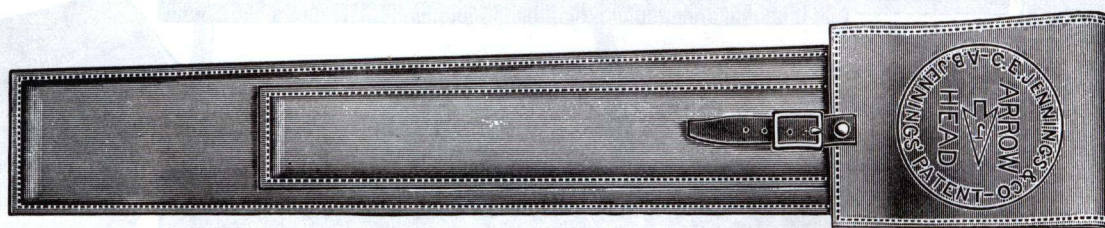

No. 100-B. Blued .....price per dozen, \$36.00

No. 100. Bright ..... " " " 31.00

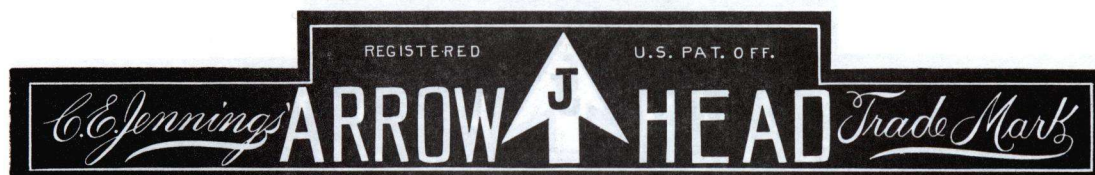

## DIRECTIONS FOR OPERATING Arrow Head Take Down Squares

To take the square apart, place the square upon the floor on the lower edge of the long arm. Place your foot upon the upper edge of the long arm and grasp the short arm with both hands close to where the square is separated. Pull steadily upward, being careful not to twist the arm; as any backward, forward, or sidewise motion will bind the tongue of the short arm in the groove. By a direct pull upward, the square will readily come apart. To put the square together, insert the tongue of the short arm into the groove of the long arm or body of the square. Lay the square down on the outer edge of the long arm and press the short arm firmly into the long arm, being careful not to twist the arm sidewise as this will make the tongue bind in the groove.

The tongue and groove are accurately milled to fit tight so that a perfectly true joint may be obtained. We guarantee these squares to be accurate when they leave the shop and to stay so with fair usage. The spring on the under side of the tongue is intended to take up any wear that may be occasioned in time, by the continual removing of the parts. The long bearing in the grooves and on the tongues, combined with the square shoulders of the parts, insure an accurate fit.

Each square is packed in a canvas case having separate pockets for each arm. Care should be taken that the square be kept in this case when taken down, to insure the tongue and groove against damage by contact with other tools and also from getting rusty. It is well to keep the tongue and groove oiled, as an additional preventive against rust.

## Box Scrapers

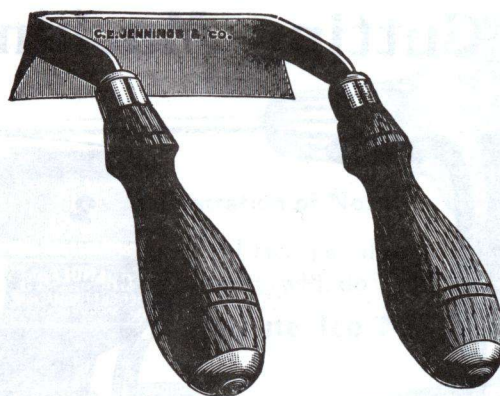

Illustration representing No. 6 1-2 Box Scraper

When a person buys a box scraper he wants a good tool. C. E. Jennings' Arrow  Head Box Scrapers are made of TOOL STEEL. The tangs extend through the handles and are riveted through the ferrules and cannot come off.

| No. 8.  | Extra Heavy ..... | " 15.00            |

Packed in boxes of half dozen.

(No. 8 Box Scraper is the same style as No. 6½, only heavier.)

## No. 10, Tack Claw

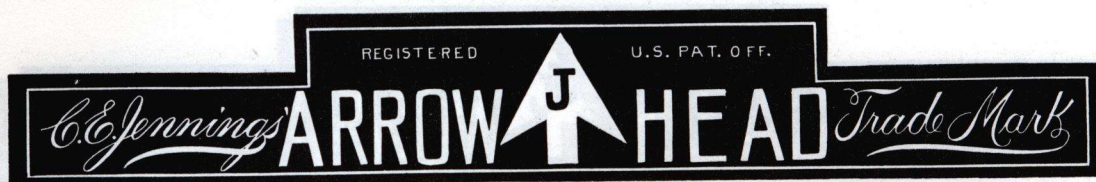

Forged Cast Steel

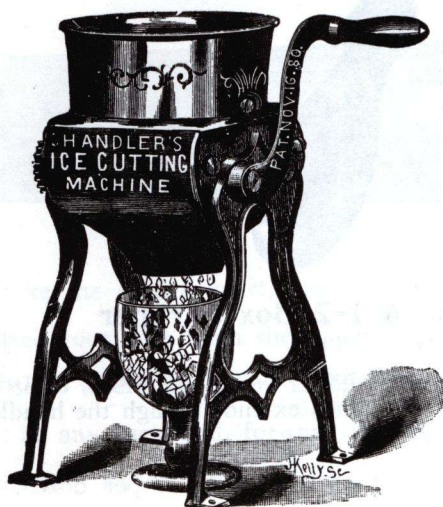

Our Arrow  Head Tack Claw is made with the same care as our other Arrow  Head tools and is fully warranted. The points of this tack claw are formed so as to get under the head of a tack and the bevel on the back is constructed so that a strong leverage may be brought to bear, thereby enabling the user to pull a tack with the greatest ease.

Forged Steel, Flat Shank, Nickel Plated Ferrule, Black Handle.....per dozen, \$1.50

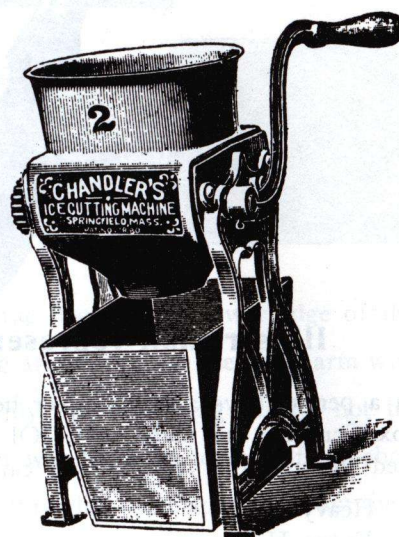

Packed one dozen in a box

## CHANDLER'S PATENT Ice Cutting Machines

No. 1

No. 2.

### NO CHILLED HANDS

Convenient, Cheap and Portable Machines for Hotels, Dining Rooms, Restaurants, Bars, Hospitals, and indispensable for Family Use.

Made in four sizes: No. 1, for Bar Tops and Soda Counters; No. 2, for Family and universal use; No. 2½, for Hotels, Hospitals and Boarding Houses; No. 3, for large Hotels, Confectioners, etc.

The No. 1 Machine, as shown in the above cut, occupies a space only six inches square, is about twelve inches high, and can be attached by screws to a bar, counter, table or shelf, as desired. It turns easily and can be operated by a child ten years old. Weighs 7½ lbs.

The No. 2 stands 14 inches high, occupies space 7½ inches square; for Family and universal use. Weighs 14 lbs.

The No. 2½ stands eighteen inches high, occupies a space eight by eleven inches, weighs about 25 lbs., and will take in a piece of ice weighing 12 lbs.

The No. 3 stands two feet high, occupies a space fifteen inches square, weighs about 80 lbs., and will take in a piece of ice weighing 25 lbs.

|        |   |                     |                   |              |

No. 1350 Ice Pick—Note the Flat Tapered Blade. Price per dozen .....\$3.50  
Blades measure about 5 inches long. Neat black Wood Handle. For heavy work.

All of the above packed one in a carton. One-half dozen in an outside container.

(Over)

## Information Regarding Ice Picks

To **Waste Ice** is an **unnecessary expense**. For a whole season the originator of these ice needles tested every ice pick he could purchase with the result that he found the **thinner the point of the pick or needle the better it would cut ice and the less ice is wasted**.

The Handles of our Arrow Head Ice Needles are made of a **pure composition metal** that will **not rust**, and contain **nothing injurious to the food**.

People who have been in the habit of using a large blunt pointed ice pick or a screw driver for breaking ice will not believe what these ice needles will do until they try them. A trial, however, will convince the most skeptical of the saving that can be made in their ice bills by using our Arrow  Head Ice Needles.

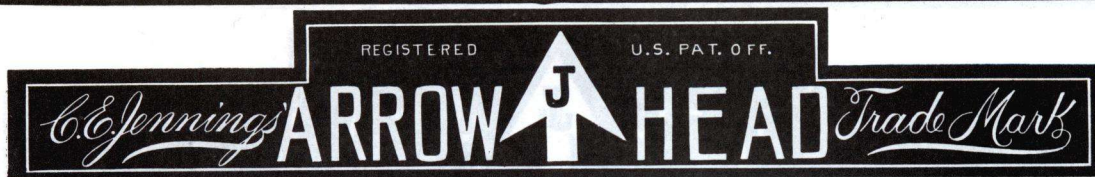

## Directions

In using our Arrow Head Ice Needles, all that is necessary is to **Push the Needle Point into the ice** near the edge of the cake. The **nearer** the edge, the **smaller** the piece of ice. In this way you can cut off as small a piece or as large a piece as you want, absolutely without waste. To reduce a large cake of ice into small pieces, place it in a bowl or other receptacle. A few strokes of the ice needle will reduce the cake of ice into small pieces.

For shaving ice for punches or for use in an ice cream freezer, we recommend our No. 13 Ice Shaver.

Our No. 3 Magazine Ice Needle will last a lifetime, and may be carried in the pocket. This Ice Needle is especially adapted for nurses, hospitals, and for use on picnics, or for automobile parties. Extra blades are furnished at very small cost.

Remember, a **woman as well as a mechanic** needs good tools for her work. Do not insult her intelligence by offering her an inferior article. By ordering Arrow Head Tools you may be sure of the quality, as every Arrow Head tool is fully warranted.

## Tool Outfit No. 61

### With 26 Warranted Tools

The Brace Operates as a Handle for the Case.  
Patent Applied for.

Illustration of Tool Outfit No. 61 closed

#### CONTENTS

- 1 Tool Holder
- 1 Brace
- 1 Hammer
- 1 Hack Saw
- 1 Rule
- 1 Wrench
- 1 Tack Claw
- 1 Knurled Screw Driver
- 2 Knurled Nail Sets
- 1 Knurled Prick Punch
- 1 Countersink
- 3 Gimlet Bits
- 4 Auger Bits
- 2 Screw Driver Bits
- 1 Chisel
